

**B.Tech DEGREE EXAMINATION, NOVEMBER 2023**

### Seventh Semester

## 18AIC302J - WEB PROGRAMMING FOR ARTIFICIAL INTELLIGENCE

*(For the candidates admitted during the academic year (2020-2021 & 2021-2022))*

**Note:**

- i. **Part - A** should be answered in OMR sheet within first 40 minutes and OMR sheet should be handed over to hall invigilator at the end of 40<sup>th</sup> minute.
- ii. **Part - B** and **Part - C** should be answered in answer booklet.

**Time: 3 Hours****Max. Marks: 100**

**PART - A (20 × 1 = 20 Marks)**

**Marks BL CO**

**Answer all Questions**

- |    |   |   |   |   |
|----|---|---|---|---|
| 1. | Identify the class that styles a table with a light gray background to rows while the cursor hovers over them.  | 1 | 2   | 1 |
|    | (A) .table  |   | (B) .table-striped                                  |   |
|    | (C) table-bordered  |   | (D) .table-hover                                    |   |
| 2. | Which type of CSS is used in the below code?<br><p style = "border:2px solid red;">   | 1 | 2   | 1 |
|    | (A) Internal CSS  |   | (B) Inline CSS                                      |   |
|    | (C) External CSS  |   | (D) Void CSS  |   |
| 3. | An HTML form is to be designed to enable the purchase of office stationery. The required items are selected (checked), credit card details are to be entered, and the submit button is pressed.<br>Which one of the given options would suit sending the data to the server. Assume that security is handled in a transparent way to the form design. | 1 | 3   | 1 |
|    | (A) Only GET  |   | (B) Only POST                                       |   |
|    | (C) Either GET or POST  |   | (D) Neither GET nor POST                            |   |
| 4. | Select the correct statement about Bootstrap.   | 1 | 2   | 1 |
|    | (A) Bootstrap is a sleek, intuitive, and powerful, mobile-first front-end framework for faster and easier web development   |   | (B) It uses C, C++, and Javascript                  |   |
|    | (C) Bootstrap was developed by James Gosling.   |   | (D) Bootstrap is a full stack development framework |   |
| 5. | Pick the correct way in which we can call the JavaScript code.  | 1 | 1   | 2 |
|    | (A) Triggering Event  |   | (B) Preprocessor                                    |   |
|    | (C) Function/ Method  |   | (D) RMI   |   |
| 6. | Which of these is a correct output for the JavaScript code given below?<br>string X= "Hello";<br>string Y="Students";<br>alert(Y+X);  | 1 | 3   | 2 |
|    | (A) Hello Students  |   | (B) Hello_Students                                  |   |
|    | (C) Students_Hello  |   | (D) StudentsHello                                   |   |
| 7. | The correct syntax to set the background color of all h1 elements to yellow in jQuery   | 1 | 2   | 2 |
|    | (A) \$("h1").style("background-color","yellow");  |   | (B) \$("h1").html("background-color","yellow");     |   |
|    | (C) \$("h1").css("background-color","yellow");  |   | (D) \$("h1").layout("background-color","yellow");   |   |

- |     |   |   |   |   |
|-----|---|---|---|---|
| 8.  | Which object is used to make an AJAX request?   | 1 | 1 | 2 |
|     | (A) XMLHttpRequest (B) JSONRequest  |   |   |   |
|     | (C) HTTPRequest (D) AJAXRequest   |   |   |   |
| 9.  | Select the correct syntax to create the module in AngularJs.  | 1 | 2 | 3 |
|     | (A) ar myModule= module(); (B) var myModule= new Module();  |   |   |   |
|     | (C) angular.module("app", []); (D) var Module= new Module(my);                                      |   |   |   |
| 10. | Which fs module in Node.js is used to get file information?   | 1 | 2 | 3 |
|     | (A) fs.open(path, flags[, mode], callback) (B) fs.stat(path, callback)                              |   |   |   |
|     | (C) fs.readFile(path, flags[, mode], callback) (D) None of the above                                |   |   |   |
| 11. | The Node.js modules can be exposed using  | 1 | 1 | 3 |
|     | (A) impose (B) module   |   |   |   |
|     | (C) exports (D) showcase  |   |   |   |
| 12. | Which of the below architecture patterns is angular based on ?                                      | 1 | 1 | 3 |
|     | (A) MVC (B) VMC   |   |   |   |
|     | (C) MCV (D) CMV   |   |   |   |
| 13. | Which is the correct statement to run migrate command in Django?                                    | 1 | 1 | 4 |
|     | (A) run manage.py migrate (B) py migrate  |   |   |   |
|     | (C) py manage.py pymigrate (D) py manage.py migrate   |   |   |   |
| 14. | Which template tag is used to create variables directly in the Django template?                     | 1 | 1 | 4 |
|     | (A) {% with %} (B) <% with %>   |   |   |   |
|     | (C) << with >> (D) {{ with }}   |   |   |   |
| 15. | What does {{NAME}} mean in Django templates?  | 1 | 2 | 4 |
|     | (A) {{ name }} will be the output (B) It will be displayed as name in HTML                          |   |   |   |
|     | (C) The name will be replaced with values of Python variable (D) None of the above                  |   |   |   |
| 16. | Which command is used to create a project in Django?  | 1 | 3 | 4 |
|     | (A) \$ django-admin createproject project_name (B) \$ django-admin startproject project_name        |   |   |   |
|     | (C) \$ django startproject project_name (D) \$ django createproject project_name                    |   |   |   |
| 17. | What is the primary function of a web crawler?  | 1 | 2 | 5 |
|     | (A) To index and organize website content (B) To encrypt and secure website data                    |   |   |   |
|     | (C) To analyze website traffic and user behavior (D) To improve website design and layout           |   |   |   |
| 18. | How does a web crawler determine which pages to visit on a website?                                 | 1 | 2 | 5 |
|     | (A) By using keywords to search for relevant content (B) By randomly selecting pages on the website |   |   |   |
|     | (C) By following links on the website's homepage (D) By visiting every page on the website          |   |   |   |
| 19. | What is the term used to describe a website that is easy for a web crawler to navigate and index?   | 1 | 1 | 5 |
|     | (A) Crawler-friendly (B) Spider-friendly  |   |   |   |
|     | (C) Search-friendly (D) Index-friendly  |   |   |   |

20. What is the term used to describe a website that has been blocked by a web crawler?	1	1	5
(A) Spidered			
(B) Crawled			
(C) Indexed			
(D) Blacklisted			

**PART - B (5 × 4 = 20 Marks)**

Answer **any 5** Questions

	Marks	BL	CO
21. How do style sheets work? Give examples of the various methods used to include style information in a HTML document.	4	2	1
22. Describe AJAX. Outline the positive aspects of AJAX for creating interactive online apps.	4	2	2
23. What does AngularJS's data binding mean? Describe the variations between one-way and two-way binding.	4	4	3
24. Summarize the architecture of Django.	4	2	4
25. Discuss the web crawling strategies along with its benefits.	4	2	5
26. Develop an HTML page to display a square with the use of 4 images.	4	2	1
27. For the following form, write down the JavaScript code to swap the contents of the two text boxes: <FORM NAME="DAFORM"> Input text1: <INPUT type="text" name="A"> Input text2: <INPUT type="text" name="B"> </FORM>	4	3	2

**PART - C (5 × 12 = 60 Marks)**

Answer **all** Questions

	Marks	BL	CO
28. (a) Make an HTML page highlighting the Department's facilities in your College utilizing frames, links, tables, and other tags. (OR) (b) Develop an HTML document that has an embedded style sheet to represent the hotel menu items. All non-vegetarian menu items should be displayed in red with small font sizes and bold font weights on the style sheet, whereas vegetarian menu items should be displayed in green with bigger font sizes.	12	3	1
29. (a) Make a form that asks users for their first and last names, email addresses, user IDs, passwords, and confirmation passwords. All required fields must be filled out, and the email address must be entered correctly. Additionally, the values given in the confirm password and password textboxes must match. Display the appropriate error messages in red color right next to the textbox where an error occurred after validating with JavaScript. (OR) (b) i. Use Javascript, DHTML, and the XMLHttpRequest object to build an AJAX program that can do a GET or POST and return a result without refreshing the HTML page. (8) ii. Write short notes on jQuery. (4)	12	3	2
30. (a) Using Angular JS, design a registration page and handle events. (OR) (b) Write a program to perform the validation of server side application using nodeJS.	12	3	3
31. (a) Describe the directory structure of the Django project. Make a simple website with the Django framework. (OR) (b) What are templates in the Django language? Differentiate between MVC and MVT design patterns. Describe the process of integrating database to Django project.	12	2	4

32. (a) Explain the process of creating a simple scraper using scrapy.

12 2 5

**(OR)**

(b) How will you extract data from pages? Outline the procedure to store and process documents and requests. Describe the techniques to extract data.
