30. a.i. Before an increase in excise duty on tea, 800 people out of a sample of 1000 wer consumers of tea. After the increase in duty, 800 people were consumers of te in a sample of 2000 persons. Find whether there is significant decreases in the consumption of tea after the increase in duty.	a	1	3	2 .
ii. In a random sample of sizes 500, the mean is found to be 20. In another independent sample of size 400 the mean is 15. Could the samples have been drawn from the same population with SD 4?	er <sup>6</sup> n	1	3	2
(OR)	n 12	2	3	2
b. The following table shows the distribution of digits in number chosen at random	11			
from a telephone directory.    Digit   0   1   2   3   4   5   6   7   8   9				
Frequency 1020 1107 997 966 1075 933 1107 972 964 853				
Test whether the digits may be taken to occur equally frequently in the directory	?			
		2	4	2
31. a. Marks obtained by 10 students in mathematics (x) and statistics (y) are given	11			
below.   x:   60   34   40   50   45   40   22   43   42   64				
x:     60     34     40     50     45     40     22     43     42     64       y:     75     32     33     40     45     33     12     30     34     51				
Find two regression lines. Also find y when $x=55$ .				
(OR)	e 12	2	4	2
b. A completely randomized design experiment with 10 plots and 3 treatments gave				
the following results.    Plot No:   1   2   3   4   5   6   7   8   9   10				
Treatment: A B C A C C A B A B				
Yield: 5 4 3 7 5 1 3 4 1 7				
Analyze the results for treatment effects?				
32. a. The values of sample mean $\overline{x}$ and sample standard deviation s for	r 12	2	5	2
15 samples, each of size 4, drawn from a production process are given below	7.			
Draw the appropriate control charts for the process average and proces	S			
variability. Comment on the state of control.				
Sample no: 1 2 3 4 5 6 7 8 9 10				
Mean: 15 10 12,5 13 12.5 13 13.5 11.5 13.5 13		¥		
SD: 3.1 2.4 3.6 2.3 5.2 5.4 6.2 4.3 3.4 4.1				
Sample no: 11 12 13 14 15				
Mean: 14.5 9.5 12 10.5 11.5				
SD: 3.9 5.1 4.7 3.3 3.3				
			5	2

## **B.Tech. DEGREE EXAMINATION, JUNE 2023**

Fifth Semester

## 18MAB301T - PROBABILITY AND STATISTICS

(For the candidates admitted from the academic year 2018-2019 to 2021-2022)

The T	- 4 -	
100	ΛTΔ	•

- Part A should be answered in OMR sheet within first 40 minutes and OMR sheet should be handed (i) over to hall invigilator at the end of 40th minute.
- Part B & Part C should be answered in answer booklet. (ii)

 $PART - B (5 \times 4 = 20 Marks)$ **Answer ANY FIVE Ouestions** 21. Let X be a random variable with pdf f(x)= . Find the otherwise MGF of X and the mean. 22. If the random variable X has the following cumulative distribution function then find the (i) pdf of X (ii) P(X<1), given  $F(x) = 1 - (1+x)e^{-x}$ ,  $x \ge 0$ . Poisson random variable such P(X=2)=9P(X=4)+90P(X=6) then find mean and variance. 24. If X is uniformly distributed over (0,10) then find P(X<4) and P(2<X<5). 25. Ten oil tins are taken from an automatic filling machine. The mean weight of the tins is 15.8 kg and standard deviation 0.50 kg. Does the sample mean differ significantly from the intended weight 16 kg? 26. In a partially destroyed laboratory record of an analysis of a correlation data, the 4 1 4 2 following results only are legible. Variance of X=9 and regression equations 8x-10y+66=040x - 18y = 214then find the mean values of X and Y. 27. A garment was sampled on 10 consecutive hours of production. The number of defects found per garment is given below: 5, 1, 7, 0, 2, 3, 4, 0, 3, 2. Compute the upper and lower limits for monitoring the number of defects.  $PART - C (5 \times 12 = 60 Marks)$ Answer ALL Questions Marks BL CO PO 28. a. A bag contains 5 balls and it is not known how many of them are white. Two balls one drawn at random from the bag and they are noted to be white. What is the chance that all the balls in the bag are white? (OR) b. Suppose a continuous random variable X has the probability density function 4 1 2 otherwise Then (i) evaluate the value of k (ii) calculate the mean and variance. 1 2 2 29. a. Out of 800 families with 4 children each, how many families would be expected to have (a) 2 boys and 2 girls (b) atleast 1 boy (c) atmost 2 girls and (d) children of both sexes. (OR) b. Fit a Poisson distribution for the following distribution. 1 2 2 x 0 1 2 3 4 5 Total

f 142 156 69 27 5 1 400

and calculate the expected frequencies.
