о.	neat sketches.			
32. a.	Explain the essential components of sanitary landfill and their functions with neat sketch.	12	2	5
ъ.	(OR)  Describe about the different options for solid waste disposal and its relative merits of disposal options.	12	3	5

## **B.Tech. DEGREE EXAMINATION, JUNE 2023**

Fifth to Seventh Semester

## 18CEO306T – MUNICIPAL SOLID WASTE MANAGEMENT

(For the candidates admitted during the academic year 2018-2019 to 2021-2022)

Note: (i) (ii)	Part - A should be answered in OMR sheet within first 40 minutes and OMR shover to hall invigilator at the end of 40 <sup>th</sup> minute.  Part - B & Part - C should be answered in answer booklet.	eet should be hande
Time: 3	hours	Max. Marks: 100

						TO T		DO.
		$PART - A (20 \times 1 =$	<b>20</b> I	Marks)	Marks	BL	со	PO
		Answer ALL Qu				*		
	1.	Which wastes include large househowashing machines etc?	old	appliances such as refrigerators,	1	1	1	1
			(B)	Street				
			(D)	Ashes and residue				
	2.	The proximate analysis is used to deter			1	1	1	6
		(A) Physical	(B)	Chemical				
		(C) Biological	(D)	Physio-chemical				
	3.	Which of the following is an example	of E	-waste?	1	1	1	1
				Glass bottles				
			(D)	Fruit peels and leftover				
	4.	The quantities of wastes generated in a between			1	1	1	7
		(A) Volume of waste and type of waste	(B)	Type and physical characteristics of waste				
		(C) Type of waste and its chemical properties	(D)	Waste production and per capital income				
	5.	Information on waste quality and coalternatives in terms of	mpo	osition is important in evaluating	1	1	2	6
-		(A) Equipment	(B)	Planning and management programmes				
		(C) Systems	(D)	Control				
	6.		(B)	reduction method? Bulk purchase Use of electronic items	1	1	2	7
	7.	One of the best ways to reduce the am (A) Consumption of raw materials (C) Secondary manufacturing	(B)		1	1	2	6

02JA5-7-18CEO306T Page 1 of 4

8.	The MSW quantities are the amount (A) ppm	of wa (B)		1	1	2	7
	(C) Tonnes	` '	Per person per day				
9.	consists of dividing the total represent a collection for each crew.	colle	ection area into routes and sized to	1	1.	3	1
	<ul><li>(A) Micro routing</li><li>(C) Specific routing</li></ul>		Macro routing Path routing				
10.	When the disposal site is far away fro to provide	om tł	ne generation point, it is necessary	1	1	3	1
	<ul><li>(A) Compact truck</li><li>(C) Transfer station</li></ul>	` '	More number of crew More number of vehicles				
11.	Small to medium transfer stations hav (A) 50 tonnes/day	_	pacities generally less than 100 tonnes/day	1	2	3	1
	(C) 200 tonnes/day	` '	300 tonnes/day				
12.	Which technique is adopted to observe collection crew with the help of stop			1	2	3	1 .
	technique		Measurement time motion technique				
	(C) Manual time motion technique	(D)	Speed time motion technique				47.
13.	Composting can occur at a range temperature range is between			1	1	4	1
	(A) Below 10°C (C) 32° and 60°C	` /	12° and 30°C Above 60°C				
14.	By which method of composting that (A) Windrow composting			1	1	4	1
	(C) Anaerobic composting		Aerated static pile composting				
15.	The process of thermal degradation liquid and solid fraction in the absence			1	1	4	1
	(A) Pyrolysis	(B)	Incineration				
	(C) Sterilization		Composting				
16.	In the policy of MSW to apply 3R pri (A) Reuse, Reduce and Recover	-		1	3	5	7
	(C) Recycle, Reuse and Recover	(D)	Reuse, Reduce and Recycle				
17.	The method of land filling in the armaterial is available at the site and wa	ater ta	able is not clear the surface	1	2	5	1
	<ul><li>(A) Trench method</li><li>(C) Depression method</li></ul>		Area method Canyon method				
18.	Clay soil used in lining systems impermeable barrier having the perme	eabili	ity value less than	1	3	5	1
	(A) $10^{-6}$ cm/sec (C) $10^{-2}$ cm/sec		$10^{-10}$ cm/sec $10^{-1}$ cm/sec				

19.	Which among the following material using for manufacturing the geomembranes as liners in landfill system?  (A) Terylene (B) Polyamide (C) Thermoplastic (D) Polyvinyl chloride	1	2	5	1 =
20.	lines consist of a thin clay layer between two layers of a geotextile.  (A) Geonet (B) Geomembrane  (C) Geosynthetic clay liner (D) Geotextile	1	2	5	1
	PART – B ( $5 \times 4 = 20$ Marks) Answer ANY FIVE Questions	Marks	BL	со	PO
21.	Differentiate between the ultimate and proximate analysis of wastes.	4	1	1	6
22.	How does the inadequate and improper waste management causes the adverse environmental effects of visual and noise pollution?	4	2	1	7
23.	What are the factors involved under material recovery facilities?	4	1	2	6
24.	Write a short note on collection vehicle routing.	4	1	2	6
25.	What are the factors that affect the waste collection system?	4	1	3	6
26.	Write short note on composting of wastes.	4	2	4	7
27.	List out the environmental effects of landfill.	4	2	5.	7
	PART – C (5 × 12 = 60 Marks) Answer ALL Questions	Marks	BL	co	PO
28. a.	Explain the different sources and type based on solid waste.	12	1	1	6
b.	(OR) What are the objectives of sampling and explain in detail about the methods of sampling?	12	1	1	6
29. a.	Explain the onsite segregation and resource recovery of solid waste.	12	3	2	2
Ъ.	(OR) Write about the recycling process, requirements and its significance in solid waste management.	12	3	2	2
30. a.	Write about the collection and transfer of solid waste.	12	2	3	1
b.	(OR) Explain the different transfer stations and its design considerations.	12	2	3	1
31. a.	Explain the process of incineration with neat sketches.	12	4	4	6
	(OR)
